WHY THE UK MARKET — WHY NOW?

The UK–India Free Trade Agreement formally known as the Comprehensive Economic and Trade Agreement (CETA), which entered into force on 15 July 2026, has created a significantly stronger framework for bilateral trade. The UK has agreed to liberalise tariffs on 99% of Indian goods, creating new opportunities for Indian exporters across multiple product sectors. This includes important opportunities for sectors such as apparel, textiles, footwear, consumer goods and manufacturing products.

WHY THIS MATTERS FOR INDIAN EXPORTERS

- **Greater Tariff Advantage** – Indian products can benefit from preferential UK tariff treatment.
- **Improved Price Competitiveness** – Lower duties can strengthen the landed-price competitiveness of Indian products.
- **Wider Market Access** – Greater opportunity to approach UK retailers, brands, importers and sourcing companies.
- **Stronger India–UK Supply Chains** – An improved framework for developing long-term commercial relationships.
- **Right Time to Enter the UK Market** – With the FTA now operational, Source Fashion London 2027 provides an important platform for Indian companies to convert improved market access into buyer enquiries, samples, orders and long-term business relationships.
